September 2006

Volume XLXI, Issue 2

President's Message

Hello Everyone,

September is now in full swing. All of the students are back in school, and we are starting to receive some badly needed rain. Our August meeting was a great success. We had a large turnout of members and guests. I strongly encourage everyone to bring a guest to the September meeting. We really need our ASHRAE Fort Worth Chapter to experience

real quality growth this year.

On August 22nd, several of our Fort Worth Chapter Officers and Committee Chairs attended a "Brain Storming Session". The meeting was spearheaded by our CTTC Chairman Jen Jewers. During this session, we came up with several exciting ideas for future meetings, plant tours, and technical sessions.

In January, Rick O'Connor and I will be attending the Region VIII Strategic Planning Meeting/President-Elect training. Rick O'Connor will be in President-Elect training for the 2007-2008 year. At the Strategic Planning Meeting, we are asked to submit names of candidates in the region to be proposed for ASHRAE officers and various committee chairs. Please contact me if you would like to nominate someone from our chapter to serve at the regional or society level of ASHRAE. I need this information as soon as possible so that I may bring their name forward in January.

We have penciled in Mr. Terry Townsend, our Society President, as our guest speaker for January. The visit has yet to be confirmed by Mr. Townsend. Pending confirmation, secondary dates have been submitted to ASHRAE as well. Mr. Townsend will give his Presidential Address and a program titled "The ASHRAE Promise: A Sustainable Future".

Thank you for coming to the last monthly meeting. I look forward to seeing everyone this month as well. Please remember to RSVP for the meeting by September **18th**. Contact me at sellis@enviromaticsystems.com.

Please visit the Ft. Worth Chapter website at <http://www.ashrae-ftw.org/> for a variety of useful information such as current and past newsletters, monthly meeting schedule and links to other chapters.

Respectfully,

Sid Ellis, Jr.
Chapter President

September 20th Program: “Commercial Kitchen Hood Design”

Speaker: David Loscheon with Captive Aire

David Loscheon is the Regional Manager for Captive Aire Systems in the Northern Texas Region. He studied Mechanical Engineering at the Univ. of Illinois at Champaign, IL. He's been a part of Captive Aire Systems for 3 years. Captive Aire Systems is the nation's largest manufacturer of commercial kitchen ventilation equipment since 1971. Captive-Aire is known for its most competitive pricing and the fastest and most reliable lead times in the industry.

Have you ever asked any of the following questions: “What type of kitchen hood do I need for this application?” “Do I need make-up air for this hood and should it be tempered?” “What is the difference in Hood Ratings (Type I or Type II)?”

If you have ever asked these questions or any others related to kitchen hood design and application then join us at the September 20th Chapter Luncheon meeting

Board of Governors Meeting Minutes

ASHRAE August 16, 2006 BOG Meeting:

- **BOG Reports:**
- **Attendees:** Sid Ellis, Rick O'Connor, David James, Jay Martin, John Maryak, Garrett Brown, Don Harden, Gary Wolf, W.O. Kelly, Dennis Sutton, Tony Finch, Ian Bost, and Jennifer Jewers

ASHRAE NEWS

Web Site Features Improved Technology and Navigation
ASHRAE Unveils Redesigned Web Site

ATLANTA - With a focus on ease of navigation and new technology, the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) has unveiled its redesigned Web site, www.ASHRAE.org.

An improved web site is a corner stone of fulfilling the society's new Strategic Plan, which calls for sustainability leadership, world-class educational programs, a raised public profile and global access to technical information. A refined Google-powered search engine has been added, and site visitors will benefit from the site's 100% uptime and increased speed. The new, simpler design incorporates a technology that will integrate with the new member database that goes live this fall, allowing members to easily access subscription management tools for e-Lists and newsletters, and account history for events, purchases and dues.

"The ASHRAE web site is the key component of the Society's strategy to provide membership service and technical information to the industry," says Steve Comstock, director of publications and education. "With the new technology incorporated into the site, our members and key audiences will be able to access crucial information faster and with greater ease."

Upon logging into the site, members will have access to the MYASHRAE section where they will be able to use the site to reflect their specific interests. Members can sign up for e-mail updates when updated content has been added to a particular section, and a lost password function allows users to quickly retrieve forgotten passwords.

The simplified site navigation is now broken into six tabbed sections:

- . Members (formerly Membership)
- . Publications (formerly Education and Publications)
- . Technology (formerly Technology and Standards)
- . Education (formerly Education and Publications)
- . Events (formerly Meetings and Events), and
- . Students (formerly Student Zone)

Content from the previous site's About Us section now occupies a position at the top left of ASHRAE.org under a new About Us section.

The upgraded site will also include a redesigned bookstore upon the section's completion in December. ASHRAE, founded in 1894, is an international organization of 55,000 persons. ASHRAE fulfills its mission of advancing heating, ventilation, air conditioning and refrigeration to serve humanity and promote a sustainable world through research, standards writing, publishing and continuing education.
