ON THE LIGHTER SIDE

IT'S FOOTBALL SEASON !!!!!

Out of all the blonde jokes, this one has to be the best!

Football FINALLY makes sense.....

A guy took his blonde girlfriend to her first football game. They had great seats right behind their team's bench. After the game, he asked her how she liked the experience.

'Oh, I really liked it,' she replied, 'especially the tight pants and all the big muscles, but I just couldn't understand why they were killing each other over 25 cents!

Dumbfounded, her date asked, 'What do you mean?'

'Well, they flipped a coin, one team got it and then for the rest of the game, all they kept screaming was: 'Get the quarterback! Get the quarterback!'

I'm like...Helloooooooooooooooooo? It's only 25 cents!!!!!!

plus prescriptive path of compliance. Also proposed is a change to addendum *af* to modify energy savings requirements to recognized varied piping material pressure drops.

Six proposed addenda to Standard 62.1 are open for comment, including a proposal regarding outdoor air cleaning. Addendum 62.1c adds significant air cleaning requirements in many locations within the United States. Regarding particulate matter 2.5 micrometers and smaller, for buildings in those U.S. locations established as non-attainment for PM2.5 by the U.S. Environmental Protection Agency, 62.1c would require that the ventilation system include particle filters rated at least MERV 11 (installed between the outdoor air intake and the occupied zone). Regarding ozone air cleaning, the proposed addendum would require that the ventilation system include ozone air cleaners rated for at least 40% ozone removal efficiency.

ASHRAE, founded in 1894, is an international organization of some 50,000 persons. ASHRAE fulfills its mission of advancing heating, ventilation, air conditioning and refrigeration to serve humanity and promote a sustainable world through research, standards writing, publishing and continuing education.
